

BioPharmica Limited

ASX ANNOUNCEMENT [ASX: BPH] - 9 January 2006

Bacterial Genechip Trial Completed

I have much pleasure in announcing the completion of the bacterial Genechip trial.

As announced the blind study was conducted to validate the use of the Genechip for bacterial lung disease typing with a comparison to current detection methods. The trial involved approximately 500 clinical sputum samples from patients with suspected lung Disease.

The new lung disease test is being developed in conjunction with Dr Ben Fry and Dr Viraj Perera at RMIT University.

The Company is currently analyzing the results of the trial and expects to be in a position to release these results in the very near future.

Please contact Dr Samantha Gallagher for further information on 61+ 8 9218 9422.

Yours faithfully,

Dr Sam Gallagher
Managing Director
